

DENTACOIN

The Blockchain Solution for the Global Dental Industry

Sick Care is the plaque of the century.

4,000+ dentists are shifting the paradigm towards a *Health system that Cares.*

Secure Blockchain infrastructure, patient-centered care and intelligent prevention used jointly to improve long-term health, reduce costs and pain and ensure mutual benefits.

Through a common, industry-specific crypto currency Dentacoin (DCN) and several Blockchain-based software tools, all market participants are securely interconnected, empowered to efficiently exchange information and values.

DENTACOIN TOOLS

Bringing Patients Back Into Focus

Communication and attention are the key components on which every relationship builds. The Dentacoin Foundation has developed three Blockchain-based software applications intended to facilitate and leverage the interaction between patients and dentists.

"Dentacoin has the potential to change the relationship between patients and doctors."

Dr. David Janash, Owner of 3 dental practices in New York City (Park South Dentistry, Group Health Dental, Gramercy Dental Center)

DentaVox

dentavox.dentacoin.com

An online market research platform surveying users (patients) on various dental health topics and providing key results publicly.

Trusted Reviews

reviews.dentacoin.com

The first platform for detailed, verified and incentivized dental treatment reviews to which patients are invited by dentists.

Dentacare App

[Google Play & App Store](#)

A mobile app which teaches kids and adults to maintain good oral hygiene through a 3-month, incentivized challenge.

DENTACOIN ASSURANCE

Preaching & Practicing Preventive Dental Care

Dentacoin Assurance is a revolutionary dental, insurance-like program that compensates dentists for prevention and not only for treatment. By paying an affordable monthly premium in DCN to their dentists, patients are entitled to a lifelong, prevention-focused dental care. This Blockchain-based model brings the financial interests of patients and dentists into complete alignment without any intermediaries and establishes strong and lasting bonds.

"Dentacoin could shift the paradigm from "drill and fill" dentistry to a prevention-focused approach."

Dr. Max Ganhewa, Dentist at Dental on Flinders, Melbourne (Australia)

DENTACOIN DATABASE

Making Patients Owners of Their Dental Health Records

Another central project to be developed by the Dentacoin Foundation is a decentralized dental health database which stores patient's data in a safe and reliable way. It is fully managed by patients - only they decide what to store and who can access it. This peerless security degree and control over one's own data is ensured by the Blockchain. For dentists, this means easier and more precise prophylaxis plans and highly individualized treatment based on a more holistic view of the patient's health.

"The ability for the laboratory to easily/securely access patient data will help them better understand the patient's oral condition."

Ray Alde, CEO of Arkalign (San Jose, CA, USA)

DENTACOIN NETWORK

Developing the Largest Blockchain-Supported Dental Network

60K+ individuals, 4K+ dentists,

a series of dental labs, suppliers, producers, and mobile dental care providers united by the mission to **REshape the future of dentistry.**

“Dentacoin is not just a cryptocurrency, it is a global network which provides both health and financial benefits.”
Dr. Wesam Alani, Aura Family Dentistry, Simi Valley (CA, USA)
